PROFESSIONAL SUMMARY

Full Stack Developer experienced in Python-based development with practical expertise gained through multiple self-driven projects. Strong in developing end-to-end web applications, ensuring clean code practices, functional design, and a positive user experience.

TECHNICAL SKILLS

Languages - Python, JavaScript

Frameworks – React, Django, Bootstrap

Database - MySQL

Tools - Git, GitHub, Postman

PROJECTS

URL Checker & Info Gather | Cybersecurity Web App | **GitHub** - github.com/Megesh001000/URL-Checker-and-Info-Gather

Python · Django · HTML · CSS · Bootstrap · MySQL · Google Safe Browsing API · VirusTotal API · AbuseIPDB · Gmail API | Role: Full Stack Developer

Built a full stack cybersecurity web application with user authentication featuring three threat detection modules — URL scanning, file upload analysis, and Gmail inbox scanning

Scans submitted URLs and file-extracted links against Google Safe Browsing, VirusTotal, AbuseIPDB and phishing blacklists for malware detection

Integrated Gmail API with Google OAuth to extract URLs from emails and automatically alert users via email when a malicious link is detected

Healthy-Bite | Full Stack Food Ordering Platform | **GitHub** - github.com/Megesh001000/healthybite_site

Django · React · MySQL | Role: Full Stack Developer

- Built a full stack food ordering web application with user login/signup authentication features
- Implemented menu management, order processing, and responsive UI functionalities
- Designed a React frontend integrated with a Django backend and MySQL database

Wedding Invitation Platform | Frontend Web Application | **GitHub** - github.com/Megesh001000/Wedding-Invitation

React | Role: Frontend Developer

- Built a modern and responsive wedding invitation web application using React
- Designed an interactive user interface for presenting wedding event details
